SUMMARY

Self-taught software developer with a strong foundation in developing web and JavaScript applications across diverse personal initiatives. Dedicated to engineering seamless user interfaces, resolving complex technical challenges, and advancing full-stack expertise. Offers a background in technical support focused on troubleshooting systems, streamlining internal workflows, and providing clear documentation.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML5, CSS3, Java

Frameworks & Runtime: Node.js, React

Tools & Technologies: Git, GitHub, VS Code, Salesforce, AWS

Concepts: Responsive Web Design, Object-Oriented Programming, REST APIs, Debugging, Problem Solving

PROJECTS

Airi – Desktop AI Companion

JavaScript • Electron • Node.js

[GitHub](#)

- Built an interactive desktop AI companion using JavaScript with customizable personalities and conversational responses.
- Designed a responsive chat interface to provide real-time user interaction.
- Developed conditional logic to improve response accuracy and reduce repetitive outputs.
- Refined conversation flow to create a more natural user experience.
- Organized application logic into reusable, maintainable JavaScript components.

Portfolio Website

HTML • CSS • JavaScript • Vercel • Git

[GitHub](#) | [Live Site](#)

- Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript.
- Created interactive navigation and project pages to showcase software engineering work.
- Deployed the website using Vercel and managed updates through Git and GitHub.
- Optimized the site for desktop and mobile viewing with responsive layouts.
- Continuously improved the portfolio by adding new projects and features as development skills grow.
- Designed a clean developer-focused interface to highlight projects, skills, and professional experience.

Mama Cat Quest – Mother's Day Browser Game

HTML • CSS • JavaScript

- Developed a story-driven browser game using HTML, CSS, and JavaScript.
- Implemented interactive gameplay mechanics, player movement, and collectible-based progression.
- Designed custom game screens and user interface elements to create an engaging player experience.
- Organized game logic using JavaScript to manage events, interactions, and progression.
- Built the project as a personalized gift while strengthening front-end development and problem-solving skills.

WORK EXPERIENCE

T. Rowe Price

Baltimore, MD

Retail Investment Services

July 2024 – April 2026

- Diagnosed and resolved technical issues across internal systems and client-facing applications.
- Managed and prioritized technical support cases to ensure timely issue resolution and accurate documentation.
- Utilized Salesforce and internal CRM platforms to manage cases, maintain accurate records, and improve workflow efficiency.
- Investigated and resolved discrepancies across internal systems and client-facing tools.
- Utilized an AWS-based contact center platform alongside Salesforce and internal systems to support client service operations and technical issue resolution.

FedEx Office Print & Ship Center

Pikesville, MD

Store Associate

July 2022 - July 2024

- Operated, maintained, and troubleshoot point-of-sale and order management systems (FPOS, OTP, FUSE).
- Managed digital print and shipping workflows using internal software platforms.
- Resolved operational and technical issues to ensure smooth transaction processing.
- Maintained system accuracy and supported high-volume operations.

EDUCATION

University of Maryland Global Campus (UMGC)

Adelphi, MD | Online

Completed coursework in Computer Science

Relevant coursework: Introduction to Problem-Solving and Algorithm Design (flowcharts, logic, and algorithm planning)

Self-Directed Software Engineering Studies

2024- Present

Focus areas: JavaScript, Python, HTML/CSS, Front-End Development, Git & GitHub, building real-world software projects
