SUMMARY

Self-taught software developer transitioning into full-stack development with a strong foundation in Python and JavaScript. Experienced in building interactive applications and solving technical problems through hands-on projects. Background in technical support and system troubleshooting with a focus on improving workflows and user experience.

SKILLS & INTERESTS

Languages: Python, JavaScript, HTML, CSS

Tools & Technologies: Git, APIs (learning), React (learning), Salesforce

Concepts: Object-Oriented Programming, Debugging, Problem Solving, Frontend Development, Data Handling

PROJECTS

Airi – AI Chat Assistant (JavaScript)

- Built an interactive AI assistant using JavaScript with a customizable personality and natural language responses
- Implemented response filtering logic to reduce repetitive and robotic outputs
- Designed a chat-based frontend interface for real-time user interaction
- Improved conversational flow and user experience through response tuning
- Implemented basic logic handling and conditional responses using JavaScript

WORK EXPERIENCE

T. Rowe Price

Baltimore, MD

Retail Investment Services

July 2024 – April 2026

- Provided front-line technical support by diagnosing and resolving system-related client issues
- Ensured timely follow-up and resolution by reviewing and addressing open client cases daily
- Utilized CRM platforms (Salesforce, Tahub) to manage data, track cases, and improve workflow efficiency
- Investigated and resolved discrepancies across internal systems and client-facing tools
- Maintained accurate documentation and ensured timely resolution of technical cases

FedEx Office Print & Ship Center

Pikesville, MD

Store Associate

July 2022 - July 2024

- Operated and troubleshoot point-of-sale and order management systems (FPOS, OTP, FUSE)
- Managed digital workflows for shipping and print services using internal platforms
- Resolved operational and technical issues to ensure smooth transaction processing
- Maintained system accuracy and supported high-volume operations

TECHNICAL EDUCATION

Self-Taught Software Development

Concentrating on Python, JavaScript, and full-stack software engineering

2024- Present
